
MARK V – CUT5 PU GLOVE PRODUCT SPECIFICATIONS

DESCRIPTION:

1. Safety gloves:

HDPE fiber, Cut 5,
13 Gauge with polyurethane back.

- Quality certification

EN 420: 2003 + A1: 2009
EN 388:2003 Mechanic risks

2. End point accessory:

- Semi rigid plastic.
- It covers the finger tips and backs letting the finger pads free to keep sensitivity and fine motor skills.
- It efficiently protects against impacts, punctures and crushing (only up to the covered area and up to the plastic piece mechanical resistance limit)
- Innovation on hard barriers non-existent in the market and PATENTED.

USES:

Hands protection for medium and heavy duty work, ideal for maintenance and plant operation staff, goods stevedores, construction, etc. Designed for works where cut risk exists. PU provides excellent sweat and wear resistance.

WARNING, DO NOT WEAR THIS GLOVE:

- With different or higher risks to those specified in the product specifications.
- Where the level of risk is higher than the levels of the glove's design.
- Where fine motor skills are required.
- With products that can affect the glove's structure and its plastic pieces.

The manufacturer shall not be responsible of any personal injury, loss or damage directly or indirectly as a result of wearing this product. It is the wearer's responsibility to make sure the glove is the right one for the task.

WARRANTY: It is subject to production faults, and not to damage due to wear.
